
FAUNISTIC RECORDS FROM THE CZECH REPUBLIC – 320

Coleoptera: Chrysomelidae

Galeruca (Galeruca) dahlia dahlia (Joannis, 1865). Bohemia or., Litětiny env., Boršov u Litětín Nature Monument (5962), 27.viii.2008, 1 spec., J. Pelikán lgt. et coll.; ditto, 27.vi.2009, 31 spec., J. Pelikán lgt., coll. J. Pelikán, P. Čížek and L. Sekerka; ditto, 27.vi.2009, 6 spec., J. Krátký lgt., coll. J. Krátký and Museum of East Bohemia, Hradec Králové; ditto, 24.vi.2010, 2 spec., J. Pelikán lgt. et coll.; ditto, 24.vi.2010, 1 spec., T. Staněk lgt et coll.; all J. Pelikán det. All specimens were collected on *Serratula tinctoria* (Asteraceae) in a marshy meadow. The species has previously been recorded from Bohemia (Čížek 1987) and Moravia (Strejček 1976, 1996; Šigut 1996). However, the Bohemia record given by Čížek (1987) is erroneous, based on a misidentified specimen of *Galeruca laticollis* (Sahlberg, 1823) (P. Čížek 2011, pers. comm.). The species was omitted from the Check-list of Czechoslovak beetles (Strejček 1993), although Strejček (1976) published Moravian specimens. *Galeruca dahlia* is known from Austria, France, Germany, Hungary, Italy, Poland, Slovakia and Ukraine (Beenen 2010), and from Czech Republic, even though it was omitted from the listed range. New species for Bohemia and correction of the Check-list and the Catalogue of Palaearctic Coleoptera.
